Creative Commons Licensing

OER = Open Educational Resource. My online textbook is OER. Free and available to anyone online.

Your work is OER also. As you learn from previous Flow Vis students for Best Of Web and other assignments, so others will learn from your work.

September 2024

Last update: 16:31 (Updates every 30 minutes)

Countries (i)

	Views
 United States	1,007
 Australia	126
 India	82
 Germany	61
 Greece	42
 South Korea	37
 China	36
 United Kingdom	36
 Italy	34
 Belgium	31

Stats for August 2024

In order for your work to be OER, it must be free for the end user to own, share, and in most cases, modify.

From <https://www.google.com/search?client=firefox-b-1-e&q=oer+definition>

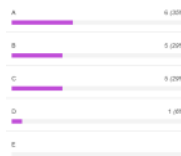

This is typically done through a Creative Commons license, not a copyright.

<https://creativecommons.org/share-your-work/licenses/>

What do you know about CC licensing?

- a) Never heard of it
- b) Have heard of it but never thought about it
- c) Yes, I know sort of what it is
- d) I know what the different levels of CC are
- e) I've chosen a CC license for my own work

2024

The **CC0** Public Domain Dedication

Release all claim on your work. Anybody can do anything with it, and not even credit you.

CC BY - say who it's by.

This license enables reusers to distribute, remix, adapt, and build upon the material in any medium or format, so long as attribution is given to the creator. This is our current licensing for the Flowvis.org website. Anybody can take our work, and commercialize it.

CC BY-SA - share alike

Same as above plus

If you remix, adapt, or build upon the material, you must license the modified material under identical terms. Can be commercialized.

CC BY-NC - non commercial

Same as BY but nobody can commercialize it

CC BY-NC-SA - non commercial, share alike

Same as BY-NC and adaptations have to also be BY-NC-SA

CC BY-ND - no derivatives

Your work can be commercialized, but not changed

CC BY-NC-ND

Your work cannot be commercialized or changed. Others can repost it, but that's all, and they still have to give attribution to you.

What do you think about our CC-BY license for your online published work? Keep in mind that your high resolution versions are yours to copyright, except you've agreed to let me use them for academic purposes.

Discuss in groups?

Current seems OK.

Collab project everyone should agree
 Don't know how the knowledge will be used, could benefit us in the future.

Are you OK with CC-BY?

1. Yes
2. No - Short answer clicker coming up to say which license is better and why.

Response

CC BY - Knowledge should never be restricted.

CC BY-NC or CC BY-NC-SA so that it stays free and non-commercial for the future (so that as many people can access/learn from it as possible)

CC BY-SA seems more fair if someone is profiting of your work they should have to modify it in some way.

creates a comfortable barrier for those who feel the need to "protect" their work

we r giving it for free for the good of society and other ppl who take reference from our class should also respect that and keep it free

1 (8%)

dont mind 1 (8%)

I haven't got the gumption to mind what happens to my work 1 (8%)

I think using CC BY rather than CC BY-NC needs to be very clearly justified. this is a class. I think commercializing our work is strange 1 (8%)

i dont mind. being able to make money on our work would be nice 1 (8%)

i think copyright law in general is anti-free speech, and all art should be free 1 (8%)

im okay with it 1 (8%)

im okay with ut 1 (8%)

N/A 1 (8%)

Are you OK with CC-BY?

1. Yes
2. CC-BY-SA
3. No - Short answer clicker coming up to say which license is better and why.
